Beatnik Pro 3.0.4.0 Working with large amounts of audio can be taxing on a PC. We'll take a look at how you can use a basic network-attached storage (NAS) device to run your audio applications with the space of a small computer.If you're like most people, you probably have many videos, photos, and audio files stored on the hard drive of your computer. Many people have as much as 50% of their storage space filled with files they've just downloaded. But some people have a different storage space issue. They don't have any kind of storage space for files on their hard drives because of the large number of files they have. So what to do? The solution is to get a network-attached storage (NAS) device. The NAS device is like a small computer that you can plug into your network and use to store large

amounts of data on your computer. The NAS is basically a box that you can plug in to your network and use to store large amounts of data. You can use the NAS to store photos and videos on your computer, or a few other data types such as audio and video files. To connect a NAS
