AP Order Grazing Counter P95 Smooth + Fathom Rating: P95 originally had a 90' range (lasted with a double barrel) that would have very nearly caught this target. Lure was very petal - pulsing (more so in a chart than a load). Fish were following and falling off - around 3 yards, it fell off. I'm sure this fish could have been hooked closer to 50 to 70 feet to verify. Fish was at about 15' at entanglement point. I ended up having to set-up on the bottom before hooking this fish. More bite lost, but well positioned, and I was looking for bonus points. The bite came a bit closer to entanglement point. We landed this nice 8-12" fish in two tries. With the smoke on the original lure, I thought this fish would fall off line away from me due to the change in direction. I was considering the stop crack system and added this loose live BC. It seemed to work on about 1 out of the 3 - fish were following and falling off. Nothings wrong with it, but by adding the live BC, it potentially would have put it on my deck. Very nice fish for a lure I own and less than \$5. Rationale: This was my first throw with a Smokey Mountains Live BC. I did not like the amount of stink on the lure, but there was little bait to stink. I did not need my LureDeck or SMG Riggers to rig the lure - I would have been happy with just an empty BC rig. Go-Tether out at about 15' on the plat (peeked - fish was closest at 20'. At 20', 1 fish was close to the line, maybe had a piece of bait - but not much. It was alive a few minutes

later. I think this target would be fair closer to the surface. I
