Recently Bought Post a review 12/4/2012 Overall I really enjoyed this game, its very fun, you can try multiple builds, so you can make the game a little harder if you want and you can also make it a little easier for a more casual play session. But it really offers a lot in one purchase. I mostly enjoyed the story, the livery system can be a little rough but it works, (but I

couldn't keep it to the maximum of 5) but you can make the game more difficult from the beginning by just feeding the cash shop more money and it's a pretty quick way to make a little something. How To Crack Inventioners:

Keep all mediums out of the way & direct your fire towards the head or body of the zombie. The zombies are programmed to head for the closest way out once you make them angry.

If zombies are approaching every six seconds, you can save time by moving for a block, then casting around to see if anything is behind you and teleport out if there is.

Graveyards are the best sources of zombies & best place to rest after escaping from the undead. Don't go into the graveyards unless the situation is dire.

Planting a bomb every 10 seconds replenishes your supply of bomb, so be mindful of resources not to overextend yourself.

Take out the brain first, but only if there is some space for it, or the zombies are blocking your way. Deaths are tedious and mean no rewards.

Clothing & tools are easily damaged while fighting the zombies, so they cannot function effectively. Get your suits & blades ready before they're needed, or you'll be in trouble!

Invest in a generator & fuel if you're going to leave the city.

If playing online, beware of bugged matchmaking, and check the # Survive or Thrive hashtag on Twitter to get the latest information. As long as you're playing correctly there should be no bugs.
