Wow is this a fun game? Get scared by Ebola and kill the Coronavirus! Does this game make you think like a virus? Or does it make you think like a moron that kills themselves by blinking their eyes? Answer this question to become the Survivor of Coronavirus - Winner gets a \$100 Amazon Gift Card!

A: Ebola the nuclear bombs in the center are your clones, with food to keep them powered  
Coronavirus the diamonds are your clones  
Influenza ice cubes are your clones  
The original question was: Who died of Ebola? The big picture says: The correct answer is 'The virus was the one that was eliminated. An Ebola infection removes tissue infected by the virus in humans. Ebola (and Coronavirus) can be eradicated by a series of nuclear bombs  
Influenza can be eliminated via an ice-cold shower  
A: PART 2 Ok, so I'm gonna go through the steps of my thought process. This: Ebola: Virus : Swine Flu: Also broken down into the flu virus or just plain flu  
Coronavirus: Ebola: cant be used against Coronavirus because there is no virus of that name, therefore the answer is "It's the virus"  
Coronavirus: Swine Flu: This still applies  
Caveat: The Coronavirus is not just limited to killing people but it can also be destroyed by Ebola... take note of the "kill" section of it. c9d1549cdd

Reviews on the store Follow us: election 2010: Scheer wants Premier to stay on Liberal throne, despite polls (Ottawa) - For the second election in a row, the race between the Liberal and Conservative parties is neck-and-neck. Premier Dalton McGuinty and the party of which he is leader remains the favourite to win. Conservative leader John Baird campaigned in Eglinton-Lawrence, Ont., Wednesday where he called Premier McGuinty's government "divorced from reality." Baird was referring to the Dalton McGuinty Liberals' repeated promise of a \$30-billion plan to provide half-priced college and university tuition and to slash hydro bills by 25 per cent. The latest promise was met with fury from voters, with many accusing McGuinty of diverting money away from child care and health care to pay for programs that will not affect prices. Baird said McGuinty needs to explain how he is going to pay for such promises, saying, "we need to ask questions." "When he's promised something, then he's the only one to be able to stand up and tell us how it's going to be done. The people deserve answers and we won't just accept any answer he wants to give, we need to have questions." During a series of Liberal pre-campaign press conferences in Toronto, Premier McGuinty was dismissive of the polls, and insisted it is the wrong way to judge the Liberal Party. "The polls on this have been proven wrong," McGuinty said. "I'm quite happy to stand by what we've done and where we are." Two polls on Wednesday pointed to a tight race. A Toronto-based polling firm, Campaign Research, found the Liberals holding a "significant lead" over the Conservatives, while a French-based polling firm, Mainstreet Research, found a statistical tie. The last time McGuinty faced a federal election was in 2008. On that occasion, he narrowly beat out Conservative leader Stephen Harper. This time, Harper is again fighting against another leader, who has fought to end the Tory tradition of asking the monarch to become head of state. To win the election, McGuinty said, the Liberals

Even the State board of chiropractors will not let HWC fraud rise to high levels and refuses to act on studies that show what is really going on. What I am writing is factual and can be officially documented by many so called experts. Simply read the pages on this website and you will see that what I am reporting here is murder. Today, nursing homes in New York State are allowed to refuse to prescribe anti-biotic medicines, based on lies and myths. The State of New York admits it is covering up mistreatment and abuse, but it refuses to change its rules, it refuses to see the evidence that its own State agencies are exposed to being fraud and is hiding behind its Board of Chiropractors to not even acknowledge the evidence. Massage is considered an "in-nurturing" procedure by the Department of Health. But in-nurturing via massages is actually "sterile" massage and is often given to people without antibiotics or IV solutions and not required to meet standards of high risk practices in the outside world. That's right. The State of New York is allowing a fringe care giver in the farming industry to manage and adjust the spine of low risk, out of state residents (and of course New York residents).
