The year is 2027. There are two new factions on Mars. One is the UN sanctioned Mars Mining Corporation (MMCo). The other is known as the Last Reconnaissance Group (LRG) and are the scavengers. The MMCo are trying to complete and colonize the planet and are doing so through mining, agriculture, etc. The LRG are searching for any significant artifacts left on the planet by the ancient alien race known as the "Ancients". Amongst this, they have found evidence of the location of a massive power source that they have named "The Black Hole". When they approach and research the power source they find evidence that it has been compromised. The LRG has disappeared into the hole. The fall out resulted in the loss of the first six personnel to enter. The following Security officers set about planning their mission and are now in communication with an external company known as "Alpha Research". AlphaR is the supplier of the LRG. The main job of AlphaR is to find the LRG. That has not been easy. AlphaR had planned an expedition but were turned down. AlphaR now has a whole team on the next Mars mission. AlphaR gives the team the equipment and skills they need. The team will be lead by Colonel Shaun "R0b0" Avery, a highly trained pilot and Lieutenant Timon "K5F2" Williams, a highly trained team commander. He has many years of experience in the LRG. The team will also be assisted by Chris "Peak7B0" Banner, a highly trained combat engineer. Other team members include Frank "Francium" Kovalevsky, a highly trained weapons specialist. And rookie team member BJ "Toy Foxy" Mcbride. Black Hole Hazard is a game that challenges the player to solve puzzles and complete objectives using their creativity. Set 4: Contracts (played here with titles from the most relevant set) 6. Corp 8. Company 9. Company Iceskater 10. Navy Skaters on Ice 5. Battlezone 11. Metal Two things strike me when I look at the table of contents of the book. First of all, it's only from the second company on. So, if someone is disgruntled with either Ottawa or Montreal, it's unlikely that they're going to see content that affects their team.
